

R. S. PIERCE, *Associative Algebras*, Springer, 1982, 436 pp.

A well-written survey of what has become of classical American algebra *à la* Dickson–Wedderburn–Jacobson after fifty-odd good mathematicians have simplified theory and proofs to the utmost. Chillingly elegant.

R. REGVALD, *Heidegger et le problème du néant*, Nijhoff, 1987, 201 pp.

Do you want to know the difference between *das Nicht*, *das Nichts*, *Nichtigkeit*, *Nichtung*, *Vernichtung*, and *nichten*? Do you want to realize that *Das Nichts selbst nichtet*? If so, then this book is warmly recommended, provided your reading knowledge of French matches that of your German.
